

# California Pesticide Use Enforcement Statistical Profile

---

**Date** March 2016

---

**Introduction** The Department of Pesticide Regulation (DPR) developed a summary of annual statewide county agricultural commissioner (CAC) pesticide enforcement program statistics. This annual California Pesticide Use Enforcement Statistical Profile consolidates CAC data from several DPR database sources. DPR also produced and distributed County Pesticide Use Enforcement Statistical Profiles with data from each individual county.

---

**Source of the data** The data sources used in the report include the Pesticide Regulatory Activities Monthly Report (PRAMR), pesticide use report, and inspection tracking databases. Also included is CAC funding information from DPR and the California Department of Food and Agriculture (CDFA).

---

**Pages of the profile** This statistical profile consists of:

- Annual statewide pesticide enforcement program statistics: General statistics about the CAC program drawn from the PRAMR and pesticide use report databases, and funding disbursed by CDFA via the unclaimed gas tax distribution and by DPR via the mill assessment;
- Statewide workload distribution by percent time: Charts showing workload distribution by licensed work hours and percentages of time dedicated to various categories of the CAC pesticide enforcement program (PRAMR);
- Statewide inspection compliance: Compliance information from the various types of inspections conducted by the CACs (inspection tracking) and a summary of the number of compliance and enforcement actions taken (PRAMR); and
- Most common violations-statewide: A listing of the code section violations that are most frequently cited on CAC inspections (inspection tracking).

---

**Purpose of the profiles** The profiles were developed to look at available data in a more comprehensive format. The CACs and DPR may use this information to:

- Develop county enforcement work plans;
- Conduct effectiveness evaluations;
- Identify trends and program changes;
- Identify CAC staff training needs;
- Identify industry outreach needs;
- Improve inspection compliance;
- Develop inspection target programs; and
- Compare county data to statewide, regional and/or other counties with similar characteristics.

---

# California Pesticide Use Enforcement Statistical Profile, Continued

---

## **Annual pesticide enforcement program statistics**

This is a three-year comparison of several statistics regarding restricted materials permits (such as number of: permits issued, permits denied, multi-year permits, sites, and notices of intent reviewed, assessed and denied); pounds of pesticides used; number of applications; number of inspections; and CDFA and DPR funding. This information can be used to identify significant year-to-year reductions or increases that may impact the county's overall pesticide enforcement program.

---

## **Workload hours and distribution by percent time**

The line chart shows a three-year comparison of CAC time spent (Licensed Work Hours) in seven categories of pesticide use enforcement. The pie chart presents the percentage of time dedicated to those activities over the three-year period. These charts identify areas where excessive or minimal time is dedicated to specific work categories that may not be appropriate for an individual program. It can also be used to identify significant year-to-year reductions or increases that may impact the overall pesticide enforcement program.

---

## **Inspection compliance**

These tables list by agricultural and structural settings the numbers of inspections and compliance rates for each inspection type the CACs conduct. It also shows the number of "No's" per inspection, the percentage of inspections with 100 percent compliance and the number of inspections where one or more violations were found. The last number on the table can be compared with the number of compliance and enforcement actions taken during the same period; however, the numbers do not correlate directly. Not all compliance and enforcement actions are taken during the fiscal year in which it is reported. Additionally, some actions may result from the discovery of violations by means other than inspections, such as investigations.

This information can be used to identify areas of particularly low compliance where industry outreach or changes in targeting strategies may be used to improve compliance. Areas of particularly high compliance where DPR's field experience indicates that the compliance rate is not as high may identify a need to review the CAC's inspections to determine if additional training is appropriate for CAC staff.

---

## **Most common violations**

This table lists the most frequently found violations by agricultural and structural settings during CAC inspections. They can be used to indicate areas where industry outreach and training are most needed.

Note: Values for some criteria can not be compared year to year due to additions and changes to law and regulations and the resultant changes to a new inspection program in 2010.

---

## California Pesticide Enforcement Program Statistics

|   | 2011          | 2012          | 2013          | 2014          |
|---|---------------|---------------|---------------|---------------|
| Operator identification numbers issued / Amended <sup>1</sup> | 14,170        | 15,074        | 14,525        | 13,419        |
| Restricted material permits issued / Amended <sup>1</sup>     | 31,130        | 31,391        | 30,903        | 30,486        |
| Permits Denied <sup>1</sup>                                   | 180           | 131           | 293           | 92            |

| Pesticide Mill Assessment <sup>5</sup>                        | \$ 19,835,253 | \$ 20,786,637 | \$ 21,680,671 | \$ 21,381,591 |

1. Source: Pesticide Regulatory Monthly Activities Report

2. Department of Pesticide Regulation Pesticide Use Report Database

3. The number of applications reported for non-agricultural records is not always consistently reported

4. Funding is for the fiscal year. Value represents 36 percent of the amount distributed by CDFA to all 10 agricultural programs (FAC 2282) and pesticide use enforcement.

5. Funding is for the fiscal year based on the previous year's workload
