

**List of Pesticide Products Prohibited from Use in Schools and Child Care Facilities
(AB 405, Chapter 566, Statutes of 2005)**

Pursuant to Education Code section 17610.1, the pesticide products listed below are prohibited from use on “schoolsites.” The term “schoolsite” is defined in Education Code section 17609 to mean any facility used for child care (other than family day care homes), or for public kindergarten, elementary, or secondary school purposes. The term includes the buildings or structures, playgrounds, athletic fields, vehicles, or any other area of property visited or used by pupils. Schoolsites do not include any postsecondary educational facility attended by secondary pupils or private school facilities.

The following pesticide products meet the criteria of Education Code section 17610.1(a), and therefore, are prohibited from use on schoolsites, effective April 1, 2012:

¹These pesticide products are prohibited from use on “schoolsites” in accordance with Education Code section 17610.1(a) because they are registered for use in the State of California either: (1) conditionally ^a, (2) as an interim registration ^b, or (3) under an experimental use permit (EUP) ^c, and contain either a new active ingredient or are intended for a new use. (Note: conditionally registered pesticide products that have fulfilled all registration requirements that relate to human health are exempted.) Also prohibited are all pesticide products that DPR canceled, suspended, or required phaseout of use.

^a California Code of Regulations section 6200 authorizes the Director to waive specific data requirements for pesticide product registration for a limited period of time to allow for generation of missing data. Most conditionally registered pesticide products are registered as such based on missing efficacy or phytotoxicity data.

^b Interim registration is established in Food and Agricultural Code sections 13161-

13170. The statute allows an applicant for registration of the first agricultural use of a pesticide active ingredient to defer submission of no more than three efficacy or environmental fate studies (e.g., soil photolysis study, field dissipation study) for a period not to exceed three years, provided certain criteria are met. The product must be a significant component of an integrated pest management system, and reduce risk to the public and the environment. In addition, all data submitted to the U.S. Environmental Protection Agency to support federal registration must be submitted to DPR, and the product must not be expected to have a significant adverse effect on public health or the environment, or threaten groundwater.

^c Experimental Use Permits (EUPs) are defined in federal statute (Federal Insecticide, Fungicide, and Rodenticide Act, section 5). U.S. EPA issues EUPs; however, before an EUP pesticide can be sold or used in California it must also be registered with DPR. Restrictions are placed on the use of the pesticide, including an expiration date, limit on total amount of product to be used, limit on total number of acres to be treated, and a requirement for quarterly reports. Once registered with DPR, the product may be sold to specific California researchers to be used in research trials; however, the products are not available to the public.
