NOTICE OF PROPOSED DECISIONS TO REGISTER PESTICIDE PRODUCTS AND PUBLIC REPORTS

The Director of the Department of Pesticide Regulation (DPR) proposes to register the following pesticide products listed below under Chapter 2 of Division 7 (beginning with Food and Agricultural Code (FAC) section 12751) after May 10, 2026, and issues this notice and public report(s) in accordance with Title 3, California Code of Regulations (3 CCR) sections 6253 and 6254. Comments concerning these proposed decisions may be directed to the Pesticide Registration Branch, Department of Pesticide Regulation, P.O. Box 4015, Sacramento, California 95812-4015 or by e-mail to registration.comments@cdpr.ca.gov until the above date. Please note that under the California Public Records Act (Government Code section 7920.000 et seq.), your written comments, attachments, and any associated contact information (e.g., your address, phone number, or email address) become part of the public record and can be released to the public upon request. For information about submitting a request for any documents related to this notice, please visit https://www.cdpr.ca.gov/public_r.htm.

DPR's Certified Regulatory Program for the Registration of Pesticides

The Secretary of Resources determined that DPR's pesticide regulatory program, including the registration, evaluation, and classification of pesticides, qualified as a certified regulatory program under Public Resources Code section 21080.5 and Title 14, California Code of Regulations (14 CCR) section 15251(i). This determination means DPR's pesticide regulatory program for the registration of pesticides is functionally equivalent to California Environmental Quality Act's (CEQA) requirements for preparing environmental impact reports (EIRs), negative declarations, and initial studies, and is therefore exempt from such requirements. The linked *Public Report(s) in Support of Proposed Decision* satisfy the requirements of DPR's CEQA certified regulatory program for the registration of pesticides and provide a summary of DPR's analysis in support of its proposed decision.

DPR's Regulations for the Proposed Decision and Public Report

A potential applicant/registrant must meet all the necessary requirements set forth in DPR's regulatory program for its product to qualify for registration consideration, including the submission of applicable supporting scientific data for review by DPR scientists. Section 6254 describes the public process and report that is required as the functional equivalent to CEQA's EIR and negative declaration requirements for proposed pesticide registration decisions. (3 CCR § 6254.) Section 6254 also requires DPR to provide notice of its proposed decision in a public report that must include a description of the proposed action; a statement of any significant adverse environmental effect that can reasonably be expected to occur, directly or indirectly, from implementing the project; a statement of any reasonable mitigation measures that are available to minimize significant adverse environmental impact; and a statement and discussion of reasonable alternatives that would reduce any significant environmental impact. (3 CCR §§ 6253, 6254.) The proposed decision must be posted for 30 days for review and comment. (3 CCR § 6253.) DPR's final action on the proposed decision must also include a written evaluation responding to any significant adverse environmental points raised during the public comment and evaluation process. (3 CCR § 6254.)

CEQA Guidelines for Certified Regulatory Programs' Public Report

DPR's public report, as the substitute document satisfying CEQA functional equivalency requirements, must include a description of the proposed activity, and either (A) alternatives to the activity and mitigation measures to avoid or reduce any significant effects that the project might have on the environment, or (B) a statement that DPR's review of the project showed that the project would not have any significant effects on the environment and therefore no alternatives or mitigation measures are proposed to avoid or reduce any significant effects on the environment. This statement shall be supported by a checklist or other documentation to show the possible effects that the agency examined in reaching this conclusion. (14 CCR § 15252(a).)

NOTICE OF PROPOSED DECISIONS TO DENY PESTICIDE PRODUCTS

Pursuant to Title 3, California Code of Regulations section 6253, the Director of the Department of Pesticide Regulation (DPR), notices the Department's proposed decisions to deny the registration of the following pesticide products. Unless specified, the reason for denial is that the required data was not submitted, was determined to be inadequate, or there was a likelihood of a significant adverse environmental effect anticipated from the use of these products in a manner consistent with its label. This action will not have a significant adverse impact on the environment. Interested persons may comment on these proposed decisions up to and including the date shown on the top line of this notice to the Pesticide Registration Branch, Department of Pesticide Regulation, P.O. Box 4015, Sacramento, California 95812-4015 or by e-mail to registration.comments@cdpr.ca.gov. Please note that under the California Public Records Act (Government Code section 7920.000 et seq.), your written comments, attachments, and any associated contact information (e.g., your address, phone number, or email address) become part of the public record and can be released to the public upon request.
