Antimicrobial Pesticides vs General Purpose Cleaner

**ANTIMICROBIAL PESTICIDES**

Antimicrobial Pesticides are used to kill germs on contaminated surfaces. *Pesticidal claims* on the product label use phrases such as:

- “Disinfect”
- “Antimicrobial”
- “Sanitizer”
- “Kills Germs”

<table>
<thead>
<tr>
<th>SANITIZING</th>
<th>DISINFECTING</th>
</tr>
</thead>
<tbody>
<tr>
<td>Surfaces and Utensils</td>
<td>1 Tbsp</td>
</tr>
<tr>
<td>1 Gallon</td>
<td>wash, rinse, wipe with solution, air dry</td>
</tr>
<tr>
<td>Floors, Tiles, Showers, Sinks</td>
<td>3/4 Cup</td>
</tr>
<tr>
<td>1 Gallon</td>
<td>Pre-wash surface, mop/wipe with solution, dry, rinse</td>
</tr>
</tbody>
</table>

Always use in accordance with the label.

Antimicrobial Pesticides will always include an **EPA Registration** number and **use instructions** for killing germs.

**GENERAL PURPOSE CLEANERS**

General Purpose Cleaners are used only to clean surfaces by removing marks and debris. General Purpose Cleaners have **No EPA** registration number. The label will not include instructions on how to kill germs.

**DESCRIPTION**

All-purpose cleaning product. Safe to use on counters, floors, sinks, and other hard surfaces.

**HOW TO USE**

Spray product on surface and wipe clean. For stubborn messes, let sit for a few minutes before scrubbing clean.
